

JOEY F. MIRAL

Website Conversion & Implementation Specialist Candidate

Pasay City, Philippines | miraljoey291@gmail.com | (+63) 9478037720 | Portfolio | Behance | GitLab | LinkedIn

PROFESSIONAL SUMMARY

IT graduate (Cum Laude, GWA 1.497) with hands-on experience across UI/UX design, frontend development, and data operations. Comfortable reviewing websites for usability, responsiveness, and functional issues, and experienced testing forms and lead-generation elements on my own deployed projects. Detail-oriented and structured in my work, with a background in SLA-driven data validation and cross-team coordination. Familiar with on-page SEO fundamentals (metadata, headings, alt text, internal linking) and actively building this knowledge further. Experienced using AI tools (Claude, ChatGPT) as part of a regular design and development workflow, including reviewing and refining AI-generated output before it's finalized.

CORE COMPETENCIES

- Website Review & QA: usability, responsiveness testing, form/CTA testing, cross-browser checks
- On-Page SEO Fundamentals: metadata, heading structure, alt text, internal linking, keyword placement (foundational, self-directed learning)
- AI-Assisted Content Workflow: prompting, reviewing, and refining AI-generated content for accuracy and tone (Claude, ChatGPT)
- Frontend Development: React, Vite, Tailwind CSS, HTML/CSS, JavaScript, component-based architecture
- UI/UX Design: Figma (wireframing, prototyping, user flows), usability principles, responsive design
- Data & Documentation: structured checklists, SLA-driven QA, ER diagramming, data validation
- Tooling: Git, Vercel, Docker, Postman, WordPress-adjacent CMS concepts, Linux

RELEVANT PROJECT EXPERIENCE

J. Portfolio — Personal Portfolio Website

- Designed, built, and deployed a full website end-to-end (React, Vite, Tailwind CSS), including a live serverless contact form (Resend) — hands-on experience testing lead-capture forms and conversion elements.
- Iterated through multiple visual directions before finalizing a cohesive brand system, applying consistent metadata, structure, and responsive design across the site.

UX/UI Case Studies (Behance) — Figma

- Designed and documented full UX case studies (Plant-Tao app, gym client dashboard, e-commerce checkout flow), each grounded in a specific usability problem and outcome.

WORK EXPERIENCE

Computer Operator — Data & IT Operations | July 2024 – June 2026 | Metropolitan Bank and Trust Company

- Validated hourly transaction data and monitored real-time batch jobs under strict SLA windows, building strong attention to detail and structured, checklist-driven problem-solving.
- Investigated and resolved data pipeline failures, documenting issues clearly and following up until resolved — directly transferable to tracking and verifying website update requests.
- Conducted performance testing (MBOA) on internal applications and reported latency trends to the development team, an early exposure to evaluating app/page performance from a user-experience lens.

Java Development Engineer | October 2023 – April 2024 | ScoutStaff Inc.

- Designed RESTful APIs using Spring Boot, translating stakeholder requirements into backend logic — a discovery and coordination process similar to gathering client website requirements.
- Collaborated directly with stakeholders to clarify requirements and communicate technical constraints clearly.

Database Designer Intern (Data Team) | March – June 2023 | 4Gives Finance

- Designed a Sales Report Database from scratch, documenting structure via ER diagrams to communicate design decisions clearly to the development team.

EDUCATION

Bachelor of Science in Information Technology — Cum Laude (GWA: 1.497)

Technological University of the Philippines, Manila | Graduated August 2023

CERTIFICATIONS & ACTIVE LEARNING

- TESDA Azure AI Fundamentals (AI-900 aligned) — in progress
- AI Engineering on Python — Udemy (in progress)
- On-Page SEO fundamentals — self-directed study (metadata, heading structure, alt text, internal linking, keyword research)
- QUEST: Quality Evaluation and Assurance in Software Testing (2023)
- Google Grasshopper – Web Development (2021)
